

## Air Ops (S): Flt Operations

Ph2 Trg flow:

This course prepares students for employment across a broad range of locations following graduation, where students will progress onto specific on-the-job training relevant to their first post.

Weeks 1-4 concentrate on the regulations and processes pertinent to facilitating aviation at both Station and Squadron level.

Week 5 teaches students the processes involved in tasking aircraft, the principles of which can be applied in a range of roles in the future.

Week 6 covers Operational and Expeditionary Air Wing processes and procedures; the simulator element includes scenarios from real-world events.

Week 7 contains the final assessment before graduation and posting to your first unit.
